

Plant I T-Track – New Product January 2006

The new T-Track from Matrix is a self contained battery powered track and trace unit which provides cost-efficient and reliable asset tracking and fleet management. T-Track has integral power, GSM module, GPS and TriBand antenna all fully sealed within an IP67 rated case to protect against ingress of dust and fluids.

T-Track has a very long life of 5 years due to the unique efficient power supply design, it requires no external power source or interconnection.

- 5 year life
- Up to 6 outgoing messages (SMS) per day
- Up to 6 positions per SMS
- Easy fit options - 3M tape, brackets or magnets
- Software is remotely configurable
- Supports both Europe and USA
- Small discrete footprint – 130mm x 130mm x 60mm, and only 0.85Kg
- Easy fit IP67 rated case which requires no ancillary connectivity
- Each T-Track has a unique ID number
- Manages both fleet and assets
- Inconspicuous
- Viewable on web screen, to see last reported position, snail trail of day's positions, and configuration of unit parameters
